How to use this book

Products are shown in four groups; Hinges, Continuous Hinges, Pivots and Architectural Hardware. Each group is organized in numerical order and no longer in alpha/numerical. Particularly in the Architectural Hardware group, the products are organized by the part number regardless of the prefix or suffix. Example WS33X Wall Stop will be in numerical sequence of 33; CS115 Crash Stop numerical sequence 115.

For convenience there are a few exceptions where an accessory follows the associated product; example, the COR72 Coordinator is followed by MBI Mounting Bracket.

Service parts section follows the finished goods. Service parts are listed in a similar order to their finished goods counterparts.

How to price protection plates

1) Look to see if the desired plate is in the the Stocked table. If it is, use this price shown.

2) If the plate is not a stocked plate,

a) Determine the hundred square inch size using the Door Plate Hundred Square Inch Sizing Chart above. If ordering in increments not shown on the chart, use the next larger size (height and/or width) shown in the chart.

Example: For a 6 1/2" x 33 1/2" plate, use 8 x 34 = 2.72 sq. inches.

b) Determine the list price for the height of plate and desired finish from the List Price (per 100 square inches) table.

Example: For a 6 1/2" height plate in US32D finish, use Under 8" column = \$17.70

For base plate pricing, multiply square inch size from part a) times the list price from b)

Example = 2.72 sq. inches X \$17.70 = \$48.14

3) If any options are desired, then add the list add per plate pricing to the base plate pricing.

For a 8402 8 X 34 US32D TK-TX, use the following.

Examples = 2.72 sq. inches X \$15.60 (base price) + \$21.00 (for UL) + \$21.00 (for TK-TX) = \$84.43
