Surface Vertical Rod Exit Device

SARGENT ASSA ABLOY

Installation Instructions

Tools Needed

Handing

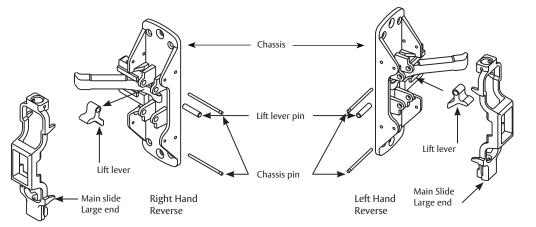

All PE8700 series devices are handed, except for the PE8710, which is field reversible. The PE8710 is shipped as LHR, unless ordered as RHR

To Change Hand of PE8710 Exit Device:

DOOR HANDS DETERMINED FROM OUTSIDE OF DOOR OR SECURED SIDE

- 1. Remove both chassis pins and main slide.
- 2. Remove lift lever pin and lift lever.
- 3. Rotate chassis 180° and reposition lift lever and lift lever pin as shown below
- 4. Position main slide with large end of main slide at the bottom and retain with chassis pins.

Surface Vertical Rod Exit Device

SARGENT

ASSA ABLOY

Installation Instructions

- With door closed, determine dimension "A" to located vertical reference line.
- If door stile is 4-1/2" wide or wider, "A" is 2-3/4". If door stile is less than 4-1/2", "A" is 1/2 the exposed width of the door stile when the door is closed against the door stop.
- Standard rail centerline height is 39-5/8" above the finished floor.
- Horizontal reference line is 36-1/4" standard. (Location of lower chassis mounting holes.)

Installation Instructions

Surface Vertical Rod Exit Device

Installation Instructions

Rail cutting guide

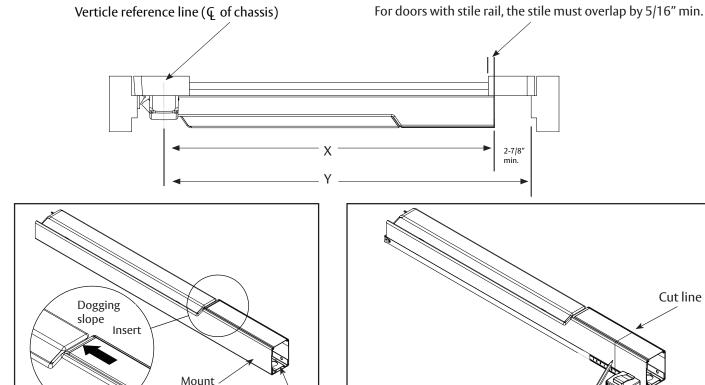

If the rail doesn't need to be cut, continue to page 12, step 7. If the rail must be cut, follow these steps on page 10 and 11:

Refer to the individual exit device installation instructions for rail cutting requirements / restrictions. Instructions will vary based on device type and options.

Determine cut off dimension "X" by subtracting 2-7/8" • from dimension "Y". Mark cut off point on mounting rail. (See below.)

Do not cut closer than 1-5/8" from the the front edge of the rail insert.

| Information for Cutting Rails | | | |
|-------------------------------|-------------|-----|--|
| Rail Sizes | Door Widths | | |
| | Max | Min | |
| E | 32" | 24" | |
| F | 36" | 33" | |
| J | 42" | 37" | |
| G | 48" | 43" | |

Carrier

A. Ensure there isn't a gap between the insert and the dogging slope, and the carrier is flush with the mount.

B. Mark rail at the required cut length.

Surface Vertical Rod Exit Device

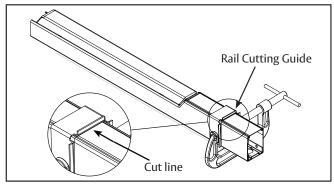

SARGENT ASSA ABLOY

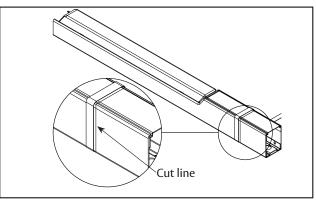

Installation Instructions

Rail cutting guide, continued.

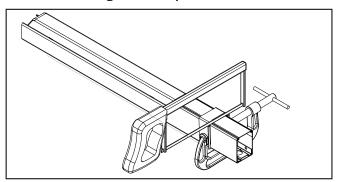

C. Ensure plastic insert support is installed under the cut line.

D. Wrap the rail and insert in masking tape, as shown.

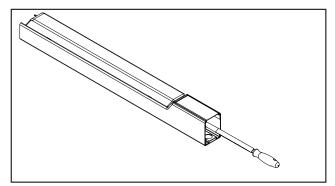

E. Place the rail cutting guide over the masking tape and align it with the cut line. Clamp the cut guide to the rail using a C-clamp.

F. Using a hack saw with a new blade or a chop saw with a metal cutting blade, cut the rail, ensuring that the blade stays pressed against the rail cutting guide.

Surface Vertical Rod Exit Device

SARGENT ASSA ABLOY

Installation Instructions

Adjust top and bottom rods:

26

Fine adjustment is made by turning the rod into the top and bottom case to shorten or out of the top and bottom case to lengthen.

Rough adjustment is made by changing hole used for the adjustment pin.

Top Rod Adjustments:

- Push on door as you push on the rail assembly.
- As soon as the door opens, release rail. The top bolt should be in the hold back position.
- If not, extend top bolt.

Note: The top bolt must go into hold back position prior to the door opening.

Bottom Rod Adjustments:

- Extend bottom bolt for maximum engagement with the bottom strike.
- When the top bolt is in, hold back, it also holds the bottom bolt in the retracted position.
- Always verify that when the bottom bolt is in the retracted position, the bolt clears the finished floor by at least 1/8" through the swing of the door.

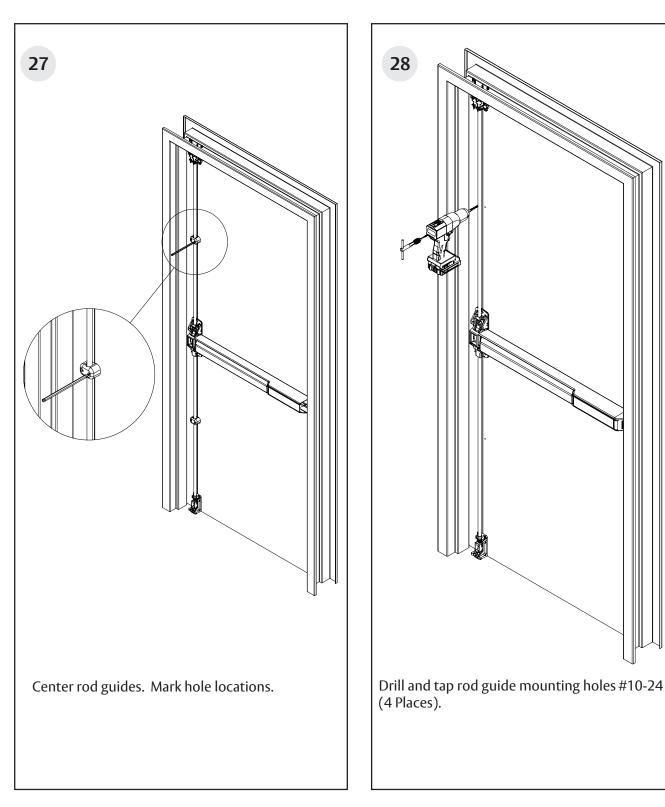

Note: Both the top and bottom latch bolts must be adjusted for maximum engagement.
